

Aryaka Customer Results: Mapping Real-World Impact to Strategic Use Cases

Use Case	Customer	Quantified Benefit	Business Outcome	Aryaka Differentiator
MPLS to SD-WAN Migration	World Kinect	25% reduced network TCO; 27.5% less latency for remote workers	Reduced vendor complexity, improved global app performance	SD-WAN + Layer 2 core, SmartLink, WAN optimization
MPLS to SD-WAN Migration	Lauridsen Group	Cut time from 3+ weeks to spin up new locations to just 2-3 days	Rapid global network deployment across 20+ sites of Unified SASE	Fully managed service, SLA-backed, centralized observability
Secure Remote Access	Thetford	88% reduction in daily network mgmt time (8 hours to 1 hr)	Enabled secure hybrid workforce access to apps and cloud	Private Access with ZTNA, integrated VPNaaS and policy control
Global Connectivity	Albermarle	Eliminated latency in mission-critical real-time traffic	Achieved SLA-backed, low-latency access globally	40+ PoPs, sub-30ms access, private core mesh
Multi-Cloud & SaaS Acceleration	Kleinfelder	Seamless scale from 1,000 to 3,000+ users	Sustained SaaS performance across geographies	Cloud Onramps, SmartLink, TCP optimization
Converged Networking and Security	Thetford	88% less daily management time	Consolidated operations from multiple vendors into one portal	OnePASS + MyAryaka + full-stack visibility
Converged Networking and Security	Manufacturing Survey Respondents	64% improved observability 50% reduced IT workload 38% network ops cost reduction	Simplified operations, improved resilience and control	Unified SASE delivery, managed service model
