Thetford Drives SD-WAN ROI & Business Value by Simplifying Global Network Operations, Cutting Costs, and Boosting Performance with Aryaka's Unified SASE as a Service

THETFORD

CASE STUDY

Manufacturing & Consumer Goods

Small Enterprise

www.thetford.com

> "There is web filtering, intrusion detection, security policies. You have a next-gen firewall. It's all in the user interface. That is for us a big benefit."
>
> - Ger Peeters, Global IT Coordinator

Thetford is a global manufacturer and market leader in mobile sanitation products and appliances for recreational vehicles, with operations spanning North America, Europe, and Asia. With over 20 sites worldwide, Thetford needed a modern, scalable network to match its growing digital footprint.

The Challenge

Managing a complex patchwork of ISPs and legacy network providers had become costly and inefficient. Thetford's reliance on traditional MPLS and on-prem ERP systems hindered agility, especially as the company accelerated its move to the cloud. With growing demands across global locations, Thetford's IT team needed a faster, leaner, and more reliable solution.

The Solution

Thetford turned to Aryaka's Unified SASE as a Service to consolidate connectivity, SD-WAN, and security into one managed platform. Aryaka's global private backbone, 24/7 support, and cloud-first design eliminated the need for multiple vendors while delivering faster deployments and seamless management across all sites.

Why Aryaka

Aryaka stood out for its fully integrated global SD-WAN and SASE platform, built on a private backbone and backed by white-glove managed services. Unlike telcos and piecemeal SASE vendors, Aryaka delivered rapid time to value with a unified solution tailored to Thetford's global scale.

Business Results with Aryaka

- **Accelerated Time to Value** Global deployment completed quickly with minimal internal effort.
- **Strong ROI** Significant savings through license consolidation, reduced downtime, and fewer IT resources required.
- **88% Lower Management Overhead** Network monitoring time cut from 8 hours to just 1 hour per day.
- **Simplified Operations** One interface for managing security policies, firewalls, and web filtering.
- **Improved Reliability** Fewer outages and faster resolution via Aryaka's fully managed service.
- **Cloud-Ready Architecture** Supports Azure integration and remote workforce expansion.
