## Traffic Growth per Region

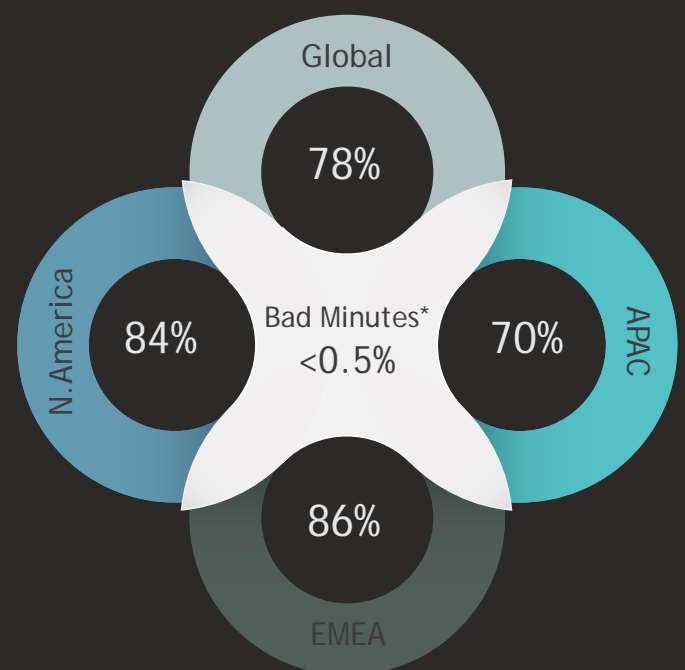

## Application Usage

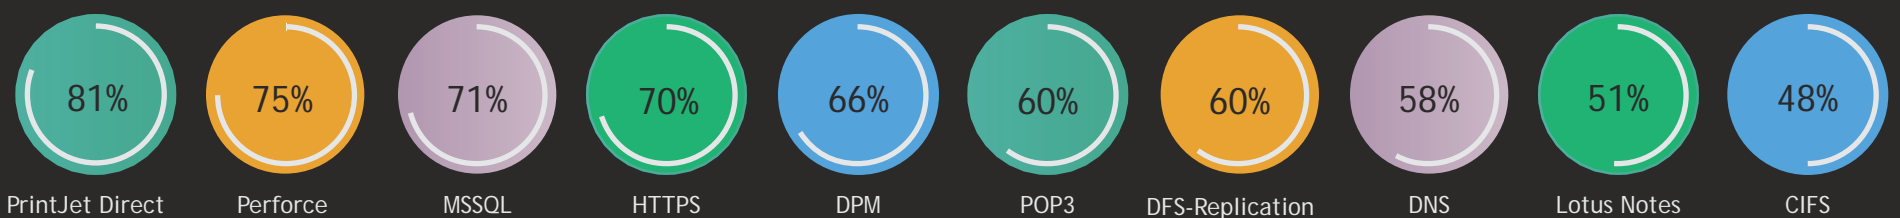

## Top Applications as a Percentage of Traffic

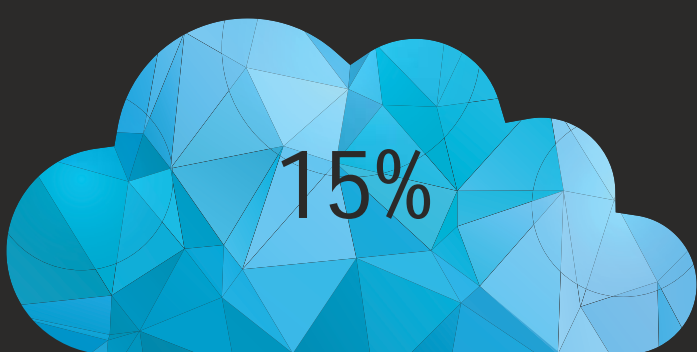

## Last Mile Link Quality

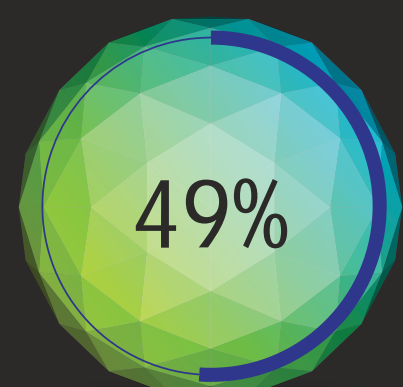

## Data Reduction per Application

## Fast Lane to the Cloud

Companies using accelerated cloud access

Accelerated Cloud Traffic

\*We define a "bad minute" as one where either measured ping packet loss exceeds 4 percent or where ping packet loss exceeds 1 percent and TCP retransmissions exceed 3 percent. During a "bad minute" businesses will likely not get the application performance that they expect and demand.
